Descriptive Summary

The 20 metre multi-purpose workboat has been designed to provide a robust working platform for a variety of inland, harbour and coastal duties including harbour maintenance, towing, pushing, dredging support, cargo transport, buoy and anchor handling.

The vessel features pushing knees forward, a 20t SWL towing hook aft, 50 t.m crane and a substantial free deck area rated to a loading of 10t/m². Accommodation, mess and sanitary facilities are provided for a crew of four. In addition the hull houses workshop and store spaces.

The vessel is to meet all the requirements of the MCA Small Commercial Vessels and Pilot Boat Code for category 2 waters and Lloyd's Special Service Craft Rules.
