

# 10m Workboat

## Principal Particulars

Length Overall	:	10.10 metres
Hull Length	:	9.90 metres
Beam Moulded	:	3.00 metres
Depth	:	1.60 metres
Design Draft	:	0.83 metres
Installed Power	:	115 BHP

## Descriptive Summary

This small and manoeuvrable vessel can carry out a multitude of tasks with its simple design and powerful engine. The all steel workboat boasts a mighty 115 bhp engine enabling either speeds in excess of 10 knots or with a change of propeller selection then a powerful bollard pull can be obtained. This allows the workboat to engage in tug operations and barge/pontoon relocation amongst many others.
